EdReady. Set. Go!

EdReady is a math and English readiness system that employs a knowledge inventory to personalize a learner's path to subject mastery within the context of a specific educational goal.

STUDENTS can self-assess for college readiness, view study options, and follow a personalized study path to fill gaps in knowledge. **EDUCATORS** can see useful data to guide students to success, improve retention, and lay a solid foundation for college completion.

INSTITUTIONS can customize EdReady. Here's how it works...

Each EdReady goal can support a unique, student-focused readiness experience. EdReady can accommodate a variety of goals, depending on your needs.

You can set permissions for live student data dashboards and downloads for teachers, administrators, and counselors.
